

# Hellobox GX6605S ROM User Guide

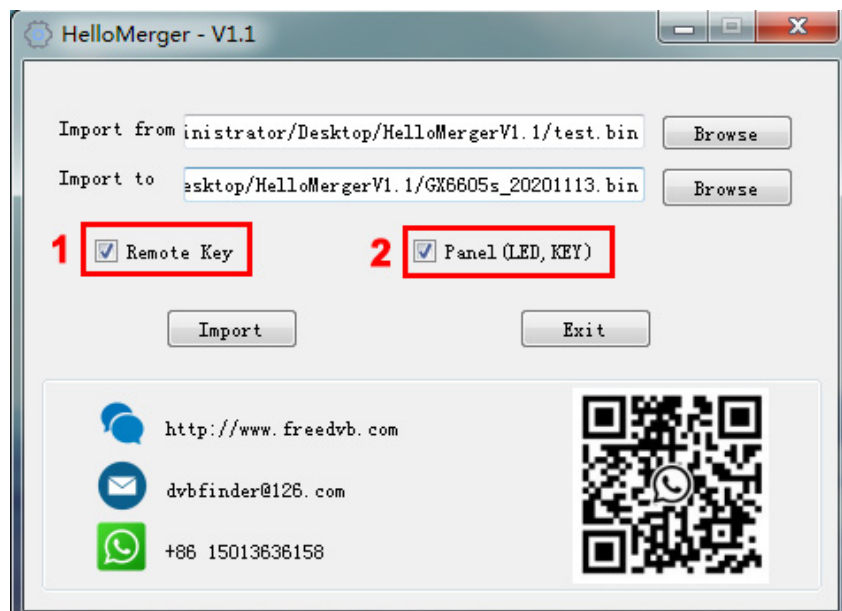

Run HelloMerger.exe on PC.

**Step 1.** Open your STB firmware(GX6605S chip).

**Step 2.** Open Hellobox GX6605S ROM.

**Step 3.** Save the new firmware.

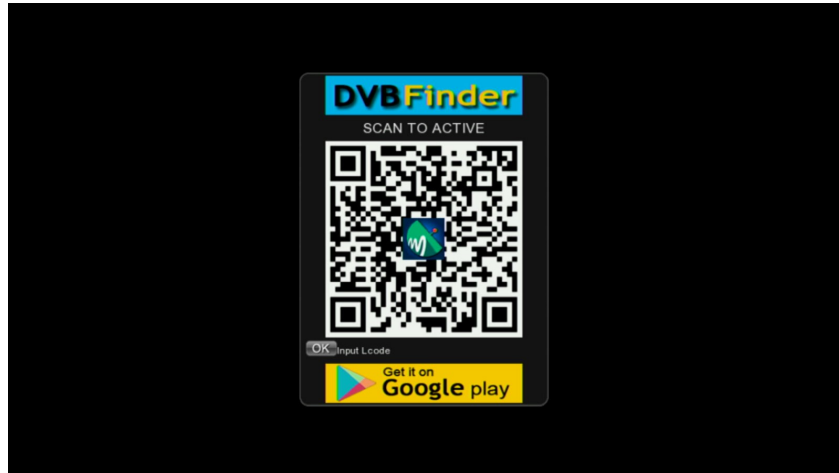

**Note 1.** Remote key must be checked to replace the key value of your remote controller.

**Note 2.** If "not support panel" is prompted, you can uncheck it and perform step 1 again. In this way, panel will not work.

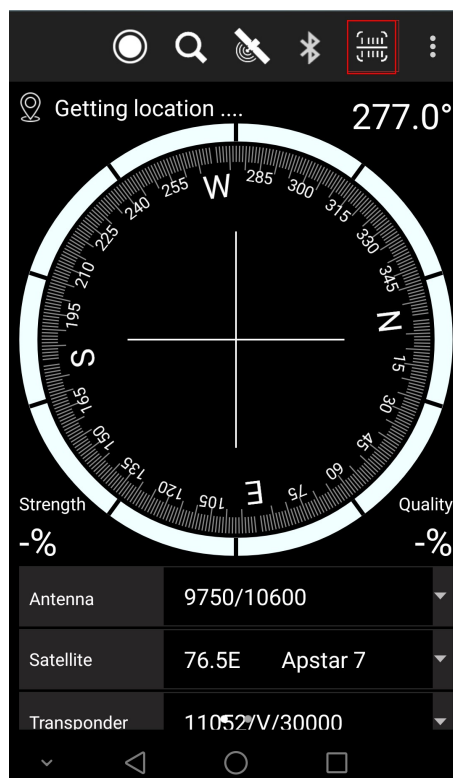

**Continue the following operations on STB.**

**Step 4.** Upgrade your STB with the new firmware.

**Step 5.** After upgrade, you will see below screen when the first boot.

**Step 6.** Open DVBFinder APP on Android phone and scan QR code to get the activation code.

**Step 7.** Input the activation code into your STB.

**Note 3.** If you can't upgrade normally, you can rename the original firmware of your STB to auto\_burn.fac, save it on a USB flash drive, and insert the drive into your STB for automatic upgrade (please delete auto\_burn.fac after upgrading).
